PRODUCT DESCRIPTION

Pumice is a natural insulator; this is the unique property that separates pumice from all other chimney material.

Schiedel Isokern is noteworthy for its flue and chimney products manufactured using high quality pumice which is recognised throughout Europe and USA.

SCHIEDEL ISOKERN OFFERS:

- The unique feature of Schiedel Isokern against other chimney systems is that pumice is known for its natural insulating properties.
- Pumice allows the flue gases in the chimney to quickly reach their optimum temperature enabling the heating appliance to reach its optimum performance shortly after lighting.
- It keeps the chimney warmer longer as the heat output of the appliance decreases, once again aiding performance and reducing the likelihood of condensation and soot build-up.
- ISOKERN is a well reputed brand known for its durability, reliability and long lasting, robust performance, under the

Schiedel product portfolio.

- We have the Largest collection of masonry chimney & fire chest products
- Our products are CE marked
- Our products are tested to the appropriate EN standards

For stove and chimney installers – whenever you register an installation with our easy to use, online guarantee registration portal, you will now accrue points based on the number of installations. So [click here](#) to start and register your installations, taking full advantage of our Lifetime Guarantee on Flex and ICID, as well as guarantees on all our other ranges, and to start earning points

A useful app with guides on installation as well as step-by-step video guides.

This app was designed for installers to have all the information they require in a few quick clicks. This makes it easier for installers rather than having to carry paperwork during the installation process with video breakdowns of each stage of the installation process.

Download the iPhone and iPad version in the App Store and Android version in the Google Play Store.
