## PRODUCT DESCRIPTION

**Schiedel SWIFT AIR Provides an alternative to underground ducting**

Schiedel Swift Air provides all the benefits of the Schiedel Swift but in addition, neatly and simply delivers combustion air to the heating appliance. Ideally suited to energy efficient buildings, the Schiedel Air System provides an alternative to underground ducting, eliminating the risk of 'wind' effect influences on the draft of the chimney.

**Features**

- The combination of advanced chimney technology and modern efficient wood burning appliances can give you the best of both worlds – an energy efficient home and the enjoyment of a real fire.
- The Swift Air System delivers combustion air directly to the appliance from outside the house, eliminating drafts in the

living room thus further improving energy efficiency.

- No warm air is taken from the room where the appliance is positioned.
- Suitable for stoves, stove inserts, cookers and boilers.
- Suitable for all fuels – gas, oil, solid fuels and biomass fuels.
- Suitable for Timber Frame, Steel Frame and Masonry construction.
- Air-independent chimneys reduce the wind effect on the air intake.
- Provisions for additional air intake channels / ducting are no longer necessary.

The ceramic range of liners and accessories are a cost effective way of safely adding a chimney into an building development, or adding a chimney to an existing renovation.

**Resistant to Thermal Shock** - The liners are extremely durable and have been tested for resistance to soot fire as well as to condensate, and meet the latest CE standards and Construction Products Regulations (CPR).

**Lightweight** - Due to advanced manufacturing techniques, we have been able to reduce the wall thickness of the liner to produce the optimal lightweight but extremely robust product.

**Smooth Inner Wall** - The smooth inner liner allows gas, the product of combustion to freely exit the chimney. Straight lines ensure a consistent fill of insulation.

For stove and chimney installers – whenever you register an installation with our easy to use, online guarantee registration portal, you will now accrue points based on the number of installations and installation type. So start to register your installations, taking full advantage of our Lifetime Guarantee on Flex and ICID, as well as guarantees on all our other ranges, and to start earning points

**A useful app with guides on installation as well as step-by-step video guides.**

This app was designed for installers to have all the information they require in a few quick clicks. This makes it easier for installers rather than having to carry paperwork during the installation process with video breakdowns of each stage of the installation process.

Download the iPhone and iPad version in the App Store and Android version in the Google Play Store.

Schiedel Ceramic Liners are CE Certified to EN 1457-1 & 2 TÜV 0780 CPD 131086 with the following designations:

**High Temperature Applications**

EN 1457-1

A1 N1 (T600 N1 G) EN 13063-1

T400 N1 D 3 G40 Ø160mm T400 N1 D 3 G50 Ø200mm

**Low Temperature Applications**

EN 1457-2

B4 N1 (T400 N1 WC O)

D4 N1 (T200 N1 WC O)\*

EN 10363-2

T400 N1 W 2 O50

T200 N1 W 2 O00

**High Temperature Applications – For Room Sealed appliances**

EN 13063-3

T400 N1 D3 G40 Ø160mm T400 N1 D3 G50 Ø200mm

\* When used on T200 rated low temperature systems, the liner system should be straight and fully ventilated.
